DETAILED ACTION

Allowable Subject Matter

1. Claims 1-28, after further consideration and search, are deemed to contain allowable subject matters and are allowed over the prior art.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a computer graphics hardware that automatically adjusts floating-point valued images to the dynamic range of a display device, so that floating-point adjustment can be performed with minimal computational burden on the software application and without the need to manually fine-tune the lighting for each scene.

The prior art of record teaches the use of high dynamic range images to create a representation similar to floating points (see paragraph 186 of US 20040165086). Ruck (US 6510282) teaches the implication of high-resolution dynamic range and transfer function to compensate for floating point representation of an image (see lines 1-13 of col. 7). However, the prior art of record fail to teach a graphics processing system for *creating an image and for generating image output data values based on the image, wherein the image is comprised of a plurality of floating point valued pixels having a first dynamic range and the image output data values have a second dynamic range, and the image output data values are adapted to a display device, the system comprising:*

Art Unit: 2676

an image statistics unit configured to compute a statistical attribute from at least one image; a transfer function generation unit configured to generate a transfer function establishing a correspondence between floating point valued pixel within the first dynamic range and an image output data value within the second dynamic range in response to the statistical attribute; and a transfer function processing unit configured to create an image output data value for each of the plurality of floating point valued pixels in accordance with the transfer function (as recited in claim 11-the broadest claim).

Accordingly, the limitations of claims 1-28 are allowed over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
